

Bird Control for Commercial Buildings in Dubai

Hotels, Warehouses, Offices, Malls & Industrial Sites

www.birdcontroldubai.com

The Commercial Bird Control Challenge

Commercial properties in Dubai face unique challenges when it comes to bird infestations. A hotel with pigeon droppings on its entrance loses guest ratings. A warehouse with birds inside risks health code violations. A mall with nesting birds in its car park faces liability. Professional bird control protects your brand, your staff, and your customers.

Sector	Main Problem	Recommended Solution
Hotels & Resorts	Guest complaints, hygiene	Wire systems + netting
Warehouses	Product contamination	Full netting enclosure
Shopping Malls	Car park & entrance nesting	Spikes + sonic deterrents
Office Buildings	Ledge & AC unit nesting	Spikes + electric track
Restaurants & Cafes	Al fresco dining areas	Overhead netting + gel
Industrial Plants	HVAC contamination	Netting + wire systems
Construction Sites	Legal nesting during build	Temporary netting

Our Commercial Service Process

Step 1: Site Survey — Free inspection of all infestation hotspots, entry points, and nesting areas.

Step 2: Custom Plan — Tailored bird control plan with product recommendations and cost estimate.

Step 3: Installation — Professional installation by trained technicians with full safety compliance.

Step 4: Sanitation — Hygienic removal of existing nests, droppings, and debris.

Step 5: Warranty — Written guarantee and annual maintenance contract available.

Why Dubai Businesses Trust Us

- ✓ Approved materials compliant with Dubai Municipality standards
- ✓ Experienced team with 1,000+ commercial installations across the UAE
- ✓ Non-lethal, bird-safe, eco-friendly methods
- ✓ Same-day emergency response available
- ✓ Annual maintenance contracts for guaranteed protection
